

Weather station Extended 15013

Overview

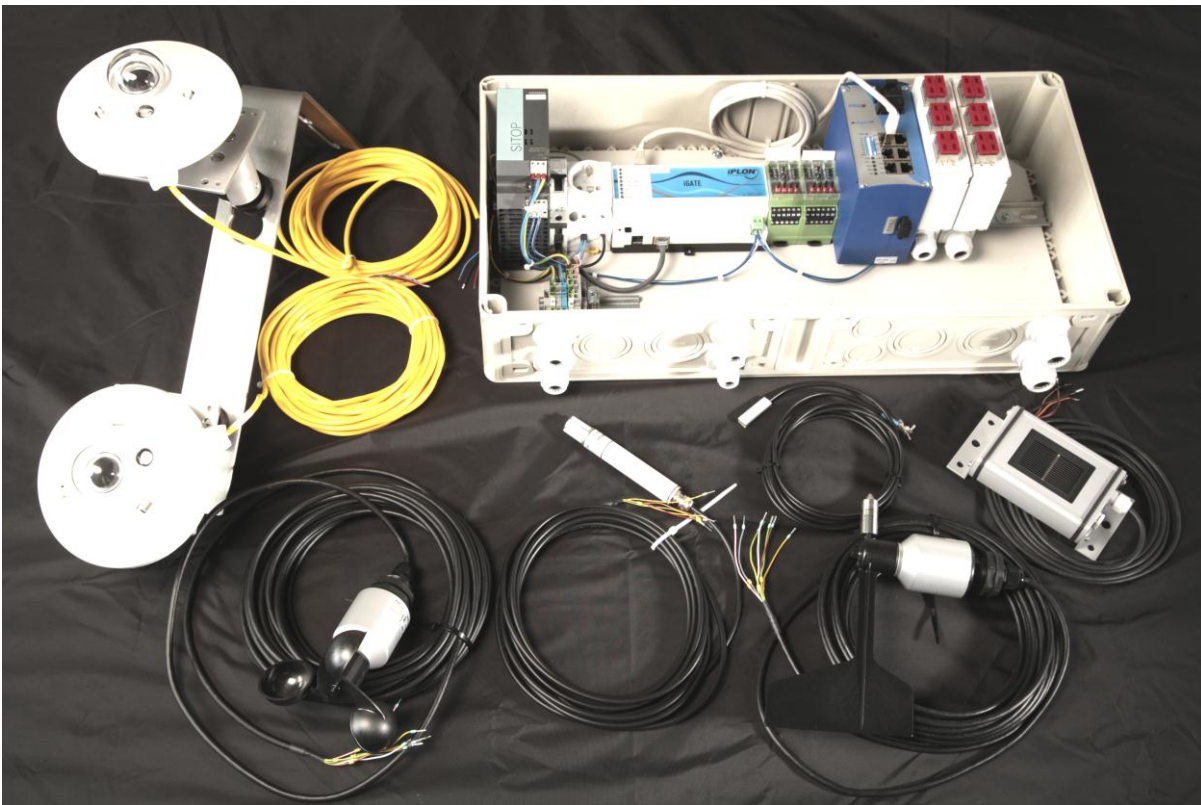

This is the extended version of sensors and for stations, which are very far from the control room.

Interfaces

- Fiber optical connection , datalogger , power supply and Lonworks (field devices)
- O&M handheld terminal
- 230 V AC aux. supply

Functionality

- Irradiation (Pyranometer) sensor : 2 Qty
- Irradiation sensor (silicium)
- Module surface Temperature
- Ambient Temperature sensor
- Wind speed sensor
- Wind direction sensor
- I/O Module (Lonworks) for connection to Control room or Inverter room

Rev 2.1 : 06/12 : subject to changes
